

Netscape

Setting up Netscape Messenger 7.0.x for Mac OS X

From the **Window** Menu and choose *Mail & Newsgroups*.

Once Mail and Newsgroups loads click **Edit** and choose *Mail & Newsgroups Account Settings*.

Choose Outgoing Server (SMTP) from the list. Then enter in your outgoing mail server address followed by your username then click the **Add Account** button.

The New Account Setup window appears. Choose *E-mail account* and click *Next*.

New Account Setup

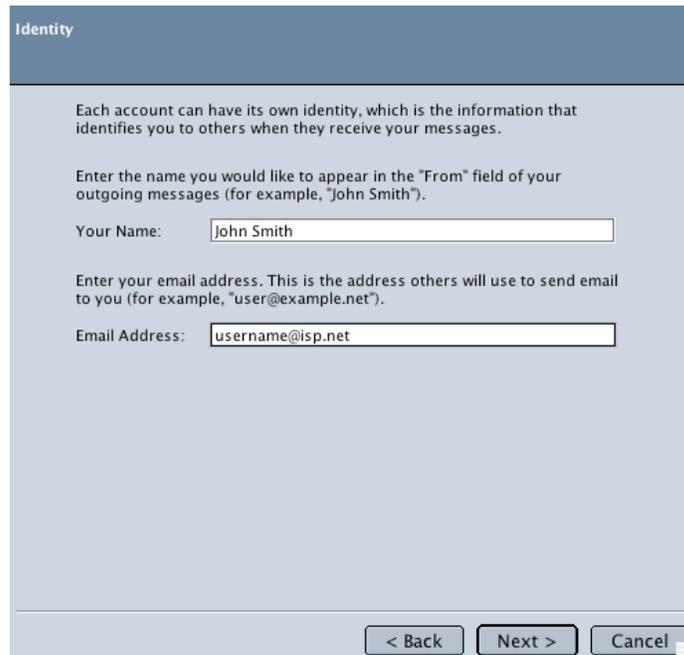

This Wizard will collect the information necessary to set up a Mail or Newsgroup account. If you do not know the information requested, please contact your System Administrator or Internet Service Provider.

Select the type of account you would like to set up:

- Email account
- AOL account (For example, jsmith@aol.com)
- Netscape Webmail (For example, jsmith@netscape.net)
- Newsgroup account

< Back Next > Cancel

The Identity window appears. Type in *your name* and *E-mail address* then click *NEXT*.

Identity

Each account can have its own identity, which is the information that identifies you to others when they receive your messages.

Enter the name you would like to appear in the "From" field of your outgoing messages (for example, "John Smith").

Your Name:

Enter your email address. This is the address others will use to send email to you (for example, "user@example.net").

Email Address:

< Back Next > Cancel

The Server Information screen appears. Choose *POP* and enter your *Incoming mail server* then click *NEXT*.

Server Information

Select the type of incoming server you are using.

POP IMAP

Enter the name of your incoming server (for example, "mail.example.net").

Incoming Server:

Your existing outgoing server (SMTP), "smtp.isp.net", will be used. You can modify outgoing server settings by choosing Mail & Newsgroups Account Settings from the Edit menu.

< Back Next > Cancel

The User Name screen appears. Input your *username* and click *NEXT*.

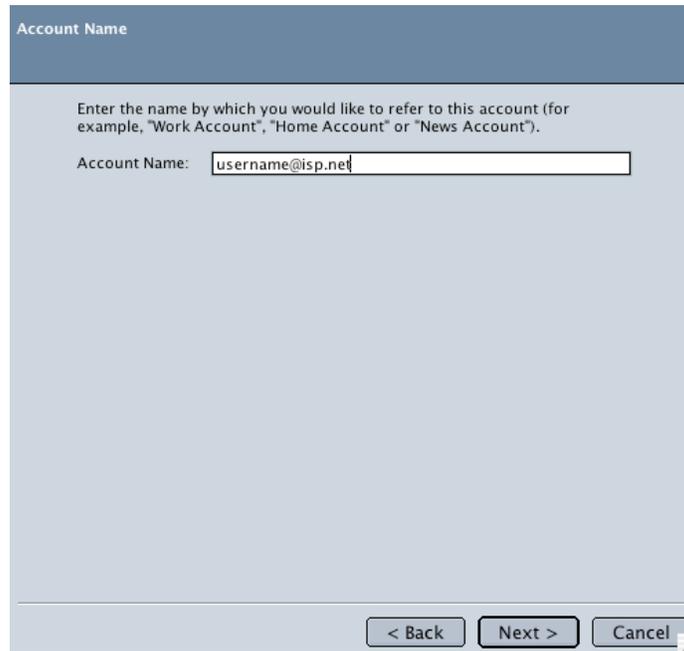

User Name

Enter the user name given to you by your email provider (for example, "jsmith").

User Name:

< Back Next > Cancel

The Account Name screen appears. Enter in your *E-mail* address and click *NEXT*.

Account Name

Enter the name by which you would like to refer to this account (for example, "Work Account", "Home Account" or "News Account").

Account Name:

< Back Next > Cancel

The Congratulations screen appears. Verify all information and click ***Finish*** to activate the account.

Congratulations!

Please verify that the information below is correct.

Account Name: username@isp.net
User Name: username
Email Address: username@isp.net
Incoming Server Name: pop.isp.net
Incoming Server Type: POP3
Outgoing Server Name (SMTP): smtp.isp.net

Click Finish to save these settings and exit the Account Wizard.

< Back Finish Cancel

To check for new messages, click on *GET MSGs* located on the main window.
